DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(b) because they are incomplete. 37 CFR 1.83(b) reads as follows:

When the invention consists of an improvement on an old machine the drawing must when possible exhibit, in one or more views, the improved portion itself, disconnected from the old structure, and also in another view, so much only of the old structure as will suffice to show the connection of the invention therewith.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance. There are no general drawings of the claimed embodiments of the invention.

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 11-21 have been renumbered 12-22. Claim 11 had been used twice in the claim listing. Therefore the second claim 11 is now claim 12.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6-8, 10-12, 15, 16, 21, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Eriksson, US Patent 4,987,598. Eriksson discloses an active noise control system comprising an reference sensor 10 generating a primary signal 42, a secondary source 14, an error sensor 16 generating an error signal 44 and controller comprising adaptive filter model 40, adaptive filter 202, adaptive filter 210, and associated adders 221 and 218. The controller receives the primary signal 42 and error signal 44 and generates the secondary signal 46.

Noninvasive secondary path modeling is accomplished by adaptive filters 202 and 210 which receive primary signal 42 (input to adaptive filter 202), secondary signal 46 (input to adaptive filter 210), and the error signal 44 (input to adder 221). As disclosed in column 2 lines 17-40 discloses that the adaptive filters 202 and 210 calculate the secondary path model. Claims 1, 6,

21, and 22 are rejected. Regarding claims 2, 3, 7, 8, 10, 15, and 16, the secondary source is adjusted by filter 232 (T copy) which changes the amplitude and phase of the secondary source according to the secondary path model T. Per claims 11 and 12, the apparatus meets the claim limitations.

Allowable Subject Matter

Claims 4, 5, 9, 13, 14, and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Pendleton whose telephone number is (571) 272-7527. The examiner can normally be reached on M-F 7-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivian Chin can be reached on (571) 272-7848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
